

Throughout their visit, patients need different forms at different times.

Wherever your forms are, we've got you covered.

## At Check-In on Kiosks and Tablets:

- uSign is embedded into patient check-in on kiosks and tablets (uArrive add on)
- uSign determines if the patient is required to complete form(s)
- If so, uSign presents all the forms
- Patients will electronically read, complete and sign the forms presented
- Discreet data elements flow into your PM System and/or EHR in real-time
- uSign captures a unique electronic signature for each document that requires signature
- uSign will time stamp and save the forms in PM System/ EHR/ document management/ network file folder/ email to staff/ print to network printer

## At Front Desk with Staff:

- uSign is available on a small tablet device, for patients who need to read, complete, sign, and save forms during their check-in with a staff person
- The tablets should be charged depending on usage (just like your cell phone)
- The tablets are always ready for use when connected to your secure and strong Wi-Fi signal
- Staff keeps the uSign tablet at their workstation
- Staff enters the patients' Medical Record # into the uSign tablet
- uSign displays the patient's name and DOB, staff positively identifies the patient

- uSign determines if the patient is required to complete form(s)
- OR: uSign presents a pick list for staff to choose the appropriate form(s) for the patient
- uSign presents all the forms... and staff person hands the tablet to the patient
- Patients will electronically read, complete and sign the forms presented
- Discreet data elements flow into your PM System and/or EHR in real-time
- uSign captures a unique electronic signature for each document that requires signature
- uSign will time stamp and save the forms in PM System/ EHR/ document management/ network file folder/ email to staff/ print to network printer

## In Exam Room with Provider:

- uSign is available on a small tablet device, for patients who need to read, complete, sign, and save forms during their exam with a clinician
- The tablets should be charged depending on usage (just like your cell phone)
- The tablets are always ready for use when connected to your secure and strong Wi-Fi signal
- Clinicians keep a uSign tablet in the exam room, or a nearby location to retrieve when needed
- The clinician enters the patients' Medical Record # into the uSign tablet
- uSign displays the patient's name and DOB, clinician positively identifies the patient
- uSign presents a pick list for the clinician to choose the appropriate form(s) for the patient
- uSign presents all the forms... and the clinician hands the tablet to the patient
- Patients will electronically read, complete and sign the forms presented
- Discreet data elements flow into your PM System and/or EHR in real-time
- uSign captures a unique electronic signature for each document that requires signature
- uSign will time stamp and save the forms in PM System/ EHR/ document management/ network file folder/ email to staff/ print to network printer
